waste, pathological waste, contaminated animal carcasses, waste of industrial, medical or any other laboratories, and waste from any source whatsoever which is capable of causing infection;".

Insertion of new PART in the principal Law.

3. The principal Law is amended by inserting next after PART X the following new part -

"PART X (a) - INFECTIOUS WASTE

Governor to make Regulations.

54A. The Governor may make regulations for all or or any of the following purposes-

- (a) the collection, treatment, and disposal of infectious waste and matters related thereto;
- (b) the establishment and conduct of a facility or facilities for the treatment of infectious waste;
- (c) imposing on the occupier of premises duties in connection with the disposal of infectious waste;
- (d) prescribing the charges to be paid by the occupier of premises for the collection and removal of infectious waste;
- (e) generally, for the manner of dealing with infectious waste.".

Passed by the Legislative Assembly this 20th day of February, 1990.

ALAN SCOTT President.

GEORGETTE MYRIE Clerk of the Legislative Assembly.

CAYMAN ISLANDS

Supplement No. 2 printed with Extraordinary Gazette of 18th April, 1990

THE PUBLIC HEALTH (AMENDMENT) LAW, 1990 (LAW 4 OF 1990)

	•		

CAYMAN ISLANDS

Law 4 of 1990

I Assent

ALAN SCOTT

Governor

12th April, 1990

A LAW TO AMEND THE PUBLIC HEALTH LAW, 1981

ENACTED by the Legislature of the Cayman Islands.

Short Title.

1. This Law may be cited as the Public Health (Amendment) Law, 1990.

Amendment of s.2. of Law 6 of 1981.

- 2. Section 2 of the Public Health Law, 1981 (hereinafter called "the principal Law") is amended -
 - (a) by inserting next after the definition of "house refuse" the following definition-

"infectious agent" means a type of microorganism, helminth, or virus that causes or contributes to the cause of increased mortality of human beings or animals;";

(b) by inserting next after the definition of "infectious disease" the following definition:

"infectious waste" means any waste material that has the potential of infecting a human being with a disease, and includes (but is not limited to) cultures and stocks of infectious agents, laboratory
