# 1. INTRODUCTION

# Purpose and Content

Section 26 of the *Public Management and Finance Law (2012 Revision)* (PMFL), provides for the Chief Officer of the Ministry responsible for Finance to Gazette a Pre-Election Economic and Financial Update (PREFU) not more than forty-two days, nor less than twenty-eight days before the General Election date. The Cayman Islands' next General Election will be held on 22 May, 2013.

The purpose of the PREFU is to provide updated information on the economic and fiscal outlook of the Government of the Cayman Islands (Government). The information in this report takes into account, to the fullest extent possible, all Government decisions made by 23<sup>rd</sup> April 2013, and all other circumstances that may have a material effect on the fiscal and economic outlook.

The PMFL requires that the PREFU provide:

- Economic forecasts for the current financial year and for the next two financial years;
- Forecast financial statements for the Core Government and the Entire Public Sector for the current financial year and for the next two financial years;
- A statement specifying the date on which the economic forecasts and forecast financial statements were prepared (see table below); and
- An explanation of how the Core Government forecast financial statements accord with the principles of responsible financial management.

# Dates on which the Forecasts and Information were finalised

Economic Forecasts	27 March 2013
Economic Data	27 March 2013
Fiscal Forecasts	23 April 2013
Specific Fiscal Risks	23 April 2013
Text finalised	24 April 2013

The current financial year ends on 30<sup>th</sup> June 2013, and is referred to in this document as FY 2012/13. Financial Year and Fiscal Year are used interchangeably in this document.

The PREFU allows for the assessment of the government's financial performance against the financial policy objectives and strategies set out in the most recent Annual Plan and Estimates.

This information is based on the year-to-date actual results and the professional judgement of staff in Ministry of Finance, District Administration, Works, Lands & Agriculture (Public Finance) using the most recent information available on economic conditions, fiscal performance and estimated outturn.

The PREFU also contains forward looking information which is based on a number of factors and assumptions. Such information involves significant known risks. However, unknown risks and uncertainties could cause actual results to differ materially from those forecasted.

# 2. STATEMENT OF RESPONSIBILITY FOR FORECAST FINANCIAL STATEMENTS

These forecast financial statements have been prepared in accordance with the Public Management and Finance Law (2012 Revision). They report the forecast financial transactions for the Core Government and the Entire Public Sector reporting entity for the forthcoming year.

The forecast financial statements were prepared by the Ministry responsible for finance on behalf of the Government. On the basis of the economic and financial information available, the Ministry has used its best professional judgement in preparing the forecast statements.

The forecast financial statements incorporate the fiscal and economic implications of all Government decisions and circumstances as at 23<sup>rd</sup> April 2013.

We accept responsibility for the accuracy and integrity of the financial information in these forecast financial statements and their compliance with the Public Management and Finance Law (2012 Revision).

To the best of our knowledge, these forecast financial statements are:

- (a) complete and reliable;
- (b) fairly reflect the forecast financial position as at 23<sup>rd</sup> April 2013 and performance for the financial years ending 30 June 2013, 2014, and 2015;
- (c) include all policy decisions and other circumstances that have, or may have, a material effect on the forecast statements; and
- (d) comply with generally accepted accounting practices.

priv Juliana O'Connor-Connolly, LLB (Hon), BA, JF

Premier and Minister of Finance

Deputy Premier and Minster of Education, Financial Services & Employment

24 April 2013

## 3. EXECUTIVE SUMMARY

Real economic growth of 1.8% is forecast for the year ending 30<sup>th</sup> June 2013. Thereafter, the economy is expected to grow at an average rate of 2.4% per year until 2015. Inflation is expected to increase from 1.7% in June 2013 to 2.3% in June 2015. Over the corresponding period, the unemployment rate is estimated to fall settling to 5.7% by June 2015.

For the fiscal year ending 30<sup>th</sup> June 2013, Government's Operating Surplus is forecast to be \$51.1 million. This amount is \$31.2 million less than the \$82.3 million originally budgeted. The Operating Surplus is forecast to improve to \$118.1 million for 2013/14 and \$135.8 million for 2014/15.

Core Government is forecast to have closing bank account balances totalling \$99.7 million for the fiscal year ending 30<sup>th</sup> June 2013. This amount is \$20.0 million less than the \$119.7 million shown in the 2012/13 original budget. Thereafter, closing bank account balances are forecast to be \$166.3 million at the end of fiscal year 2013/14 and \$250.4 million at the end of fiscal year 2014/15.

For the Entire Public Sector (EPS), closing bank balance for fiscal year 2012/13 is forecast to be \$157.8 million; this amount is \$25.1 million less than the \$182.9 million shown in the 2012/13 budget. For fiscal year's 2013/14 and 2014/15, EPS closing bank balances are forecast to increase to \$221.2 million and \$303.7 million respectively.

Core Government debt is forecast to be \$575.4 million at the end of fiscal year 2012/13. This amount is expected to further decrease to \$549.0 million at the end of fiscal year 2013/14 and \$523.7 million at the end of fiscal year 2014/15.

For the Entire Public Sector, the closing debt balance for 2012/13 is forecast to be \$717.9 million, thereafter, this balance is forecast to decrease to \$677.6 million at the end of 2013/14 and \$638.8 million at the end of 2014/15.

The Government is forecast to be in full compliance with the Principles of Responsible Financial Management relating to Net Operating Surplus and Net Worth throughout the forecast period.

Compliance with the Principles which requires a Net Debt Ratio of less than 80% is forecast to be achieved in 2013/14 and 2014/15. Cash Reserve requirement (should be more than 90 days of executive expenses) will achieve compliance in 2014/15. However, compliance will not be achieved for the Debt Servicing Ratio (should be less than 10%) during the forecast period.

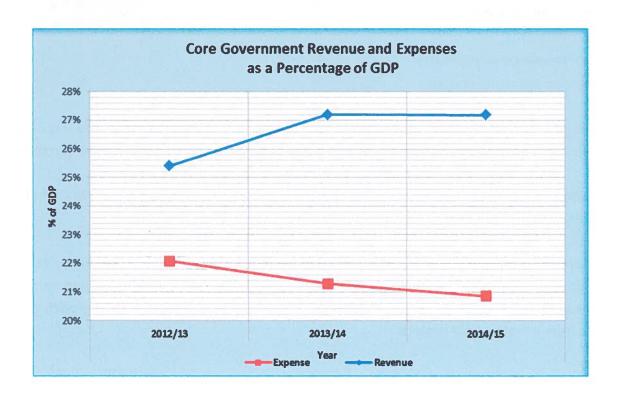

In August 2012, the Government agreed to a three-year fiscal plan with the Foreign and Commonwealth Office (FCO) for Core Government financial performance. The forecast Operating Surplus' for 2012/13; 2013/14 and 2014/15 are less than those targeted in the three year plan by \$31.2 million; \$6.2 million; and \$2.5 million respectively.

The forecast Operating Revenue for 2012/13 is less than the three year plan by \$31.8 million; 2013/14 and 2014/15 are forecast to perform better than the plan by \$7.2 million and \$9.8 million respectively. The forecast Operating Expense for 2012/13 is less than the plan by \$0.6 million; 2013/14 and 2014/15 are forecast to be higher than targeted in the plan by \$13.4 million and \$12.3 million respectively. The forecast Cash Balance for 2012/13; 2013/14 and 2014/15 are less than those targeted in the three year plan by \$20 million; \$25.6 million; and \$28 million respectively.

Table 1 below shows the key economic and fiscal indicators over the forecast period. These are discussed in further details throughout this document.

Table 1- Summary of the main Economic and Fiscal Forecasts

	2011/12 Estimated	2012/13 Projected	2013/14 Forecast	2014/15 Forecast

EPS Government Debt	743.8	717.9	677.6	638.8

### 4. ECONOMIC OUTLOOK

#### Introduction

This economic update presents the macroeconomic forecasts and assumptions for the current fiscal year and the succeeding two fiscal years. It focuses on four core indicators:

- Gross domestic product (GDP) growth;
- Inflation:
- Employment and unemployment rate; and
- Current account of the balance of payments.

Economic performance 2012 and forecasts for Financial Year ("FY") 2012/13

**GDP Growth.** Economic recovery continued in the Calendar year ended 31<sup>st</sup> December 2012 with a slightly stronger GDP growth estimated at 1.6 per cent. The key sectors showing recovery were:

- Hotels and restaurants:
- Wholesale and Retail trade;
- Construction;
- Transport and Storage;
- Communication;
- Financing:
- Insurance services: and
- Government services.

Whilst the above contributed positively to growth, real estate, renting and business activities continued to exert downward pressure. This is due to slower than expected recovery in those areas.

The combined effect of the factors listed above is expected to generate a growth in GDP of 1.8 percent for the 2012/13 fiscal year.

The forecast positive trend in GDP is expected to result in increased worker demand and corresponding increases in the demand for renting and real estate. With the restrictions on Government expenditure imposed by the Framework for Fiscal Responsibility, the major aspects of GDP growth is expected to come from private sector projects.

Value added from the hotel and restaurant sectors is estimated to have increased by 3.3 per cent as a result of higher stay-over visitors. In 2012, tourism services increased based on strong growth in air arrivals (4.1%) and cruise arrivals (7.6%).

Wholesale and retail trade activity grew by 4.5 per cent. This is consistent with the growth in imported consumer and intermediate goods adjusted for inflation.

In 2012, construction activity increased for the first time in four years by an estimated 6.7 per cent. This estimate is based mainly on the strong growth of imported building materials, partly due to incentives such as reduced duties.

The Transportation & Storage, and Communication sectors rose by 2.8 per cent bolstered by growth in transportation for tourist visitors, higher volumes of cargo transportation, and expansion of telecommunication activities. The real estate, renting and business activities sectors were estimated to have declined by 0.7 per cent. Business services and real estate activities were impacted by lower registration of companies and property transfers.

The Financing and Insurance services sectors (which accounted for approximately 42.3 per cent of GDP) were estimated to have expanded by 3.1 per cent compared to 0.1 per cent in 2011. Insurance services had an estimated increase of 5.6 per cent due to increased gross premiums and decreased net claims, while financing services expanded by 1.1 per cent based on anticipated higher earned interest in the local banking sector.

Financial services indicators continued to exhibit mixed performance in 2012 amidst heightened uncertainty in the global financial markets particularly in Europe. New partnership and insurance licenses grew by 7.4 per cent and 0.3 per cent respectively.

New company registrations, mutual funds registration (excluding master funds), stock exchange listings and banks and trusts licences all declined in 2012. The latter is the result of continued consolidation in that sector.

Source: Cayman Islands Government (Economics and Statistics Office)

**Inflation:** In Calendar year 2012, consumer prices rose on average by 1.2 per cent compared to 1.3 per cent in the preceding year. All major categories of consumer goods and services had higher average prices except communications, recreation and culture and, restaurants and hotels. The domestic inflation is mainly sourced from imported items such as food, beverages, clothing, footwear and, tobacco. Inflation in alcohol and tobacco prices was caused by the recent revenue measure that increased the price of tobacco by more than 50 per cent. In FY 2012/13, inflation is estimated at 1.7 per cent.

**Employment and Unemployment:** Economic growth in 2012 had a positive impact on labor supply and employment. The total labor force strengthened to increase the number of persons employed by 3.2 per cent to 36,401.

Higher employment levels were estimated for the food and beverage industry, construction, manufacturing, mining and quarrying as well as administrative and support services. Consequently, the

unemployment rate fell marginally to 6.2 per cent in 2012. In FY 2012/13, the number of employed persons is expected to be at 36,716 while the unemployment rate is projected to improve slightly to 6.1 per cent.

Current Account of the Balance of Payments<sup>1</sup>: Total merchandise imports declined marginally by 0.1 per cent in 2012 to \$758.5 million. This was mainly due to the plummeting value of oil imports outweighing the robust expansion of intermediate goods and capital goods imports. This, along with a higher inflow of visitor expenditure, and tempered increase in the outflow of workers' remittances, induced the slight narrowing of the country's forecasted current account of the balance of payments to 18.1 per cent of GDP in 2012. The FY 2012/13 current account balance is projected at 18.8 per cent of GDP as imports are expected to rebound in 2013 from additional construction activities.

# Forecasts and Assumptions for FY 2013/14 and 2014/15

**GDP Growth:** Overall economic growth of the Cayman Islands in the next two fiscal years will increasingly rely on local private investments in light of renewed economic and financial uncertainty in the major external markets and the Cayman Islands Government's commitments to the Framework for Fiscal Responsibility.

Construction is assumed to continue its recovery with the commencement of private sector investment projects such as the Cayman Narayana University Medical Center and Cayman Enterprise City.

Additional stimulus is expected from projects to enhance tourism facilities and infrastructure along the Seven Mile Beach area as part of the ForCayman Investment Alliance. The construction phase of these projects is expected to begin in FY 2012/13. Additionally, the projects are expected to boost the population level and stimulate domestic demand for services in several sectors such as wholesale and retail; transport, storage and communication; real estate, renting and business activities; and electricity and water supply.

Assumptions regarding the growth prospects of the US and other advanced economies are taken from the International Monetary Fund's World Economic Outlook Update as of January 2013. Altogether, these economies are forecasted to show weak growth in 2013 (1.4%), with a mild improvement in 2014 (2.2%). Continuing fiscal consolidation and protracted financial sector recovery in these countries will pose downward risks for Cayman's financial services and to a lesser extent stay-over tourism. However, it is also assumed that the impact of such risks will be mitigated by actions by the

<sup>&</sup>lt;sup>1</sup> The current account of the balance of payments measures the total value of the country's transactions against the rest of the world in terms of trade in goods and services, income and transfers. A deficit in the current account means that the Cayman Islands made more payments to the rest of the world compared to its receipts from these transactions.

Government along with the private sector. Forecast strategies include continuing product enhancements and diversification of source markets. Stronger growth for stay-over tourism is foreseen for 2015 when the first phase of the medical tourism project is expected to be operational.

Government services are projected to contract over the next two fiscal years in keeping with the Framework for Fiscal Responsibility.

The above external and domestic assumptions support a forecast growth of real GDP in 2013/14 of 2.3 per cent with slightly stronger growth of 2.5 per cent in 2014/15 (see Table 3 and Figure 1).

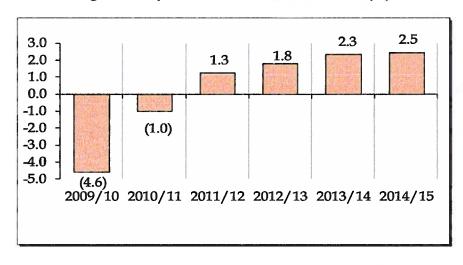

Figure 1: Cayman Islands' Real GDP Growth (%)

Source: Cayman Islands Government (Economics and Statistics Office)

Inflation: It is assumed that current US inflation projections will show moderate pressure for Cayman's inflation. However, a gradual increase in the population level and higher domestic demand as planned construction projects commence, could slightly push up domestic inflation in the succeeding fiscal years (see Table 3 and Figure 2). For FY 2013/14, inflation is forecasted at 2.2 per cent, inching upward to 2.3 per cent in FY 2014/15 (see Table 3 and Figure 2).

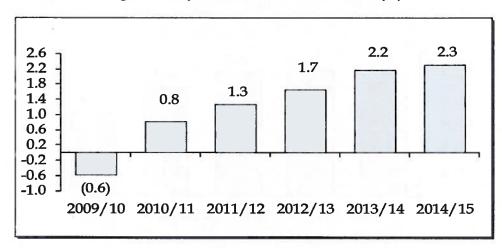

Figure 2: Cayman Islands' Inflation Rates (%)

Source: Cayman Islands Government (Economics and Statistics Office)

**Employment and Unemployment:** Local employment is assumed to have a lagged response to forecast output growth. New employment is expected to emanate from construction projects and other local services with strong linkages to these projects, complemented by the commencement of the medical tourism facility. Employment is projected at 37,442 persons in FY 2013/14 with further improvement to 38,262 persons in FY 2014/15 (see Table 3 and Figure 3).

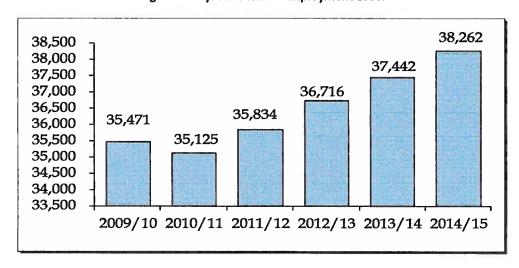

Figure 3: Cayman Islands' Employment Level

Source: Cayman Islands Government (Economics and Statistics Office)

Unemployment rate is forecasted to improve to 5.9 per cent of the labour force in FY 2013/14, and further to 5.7 per cent in FY 2014/15 (see Table 3 and Figure 4).

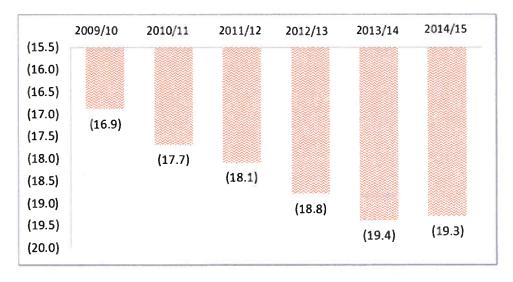

6.4 6.2 6.1 6.0 5.8 5.6 5.4 5.2 2009/10 2010/11 2011/12 2012/13 2013/14 2014/15

Figure 4: Cayman Islands' Unemployment Rates (% of Labour Force)

Source: Cayman Islands Government (Economics and Statistics Office)

Current Account of the Balance of Payments: For FY2013/14, the current account deficit is forecasted at 19.4 per cent of GDP based on the premised growth of the current account's major outflows (primarily imports of goods for the new private sector projects) outperforming the growth of inflows (primarily financial and tourism receipts) (see Table 3 and Figure 5). A slight improvement to 19.3 per cent of GDP is forecasted in FY2014/15, assuming that additional receipts will begin to come in from the new private sector investments projects.

## 5. FISCAL OUTLOOK

#### Introduction

This section provides the Government's financial forecasts for 2012/13, 2013/14 and 2014/15.

In accordance with the requirements of the Public Management and Finance Law (2012 Revision), the financial forecasts take the form of a full set of accrual based forecast financial statements. The key forecast financial statements are:

- A Forecast Performance Statement, which reports the forecast Operating Revenues and Operating Expenses measured on an accruals basis and the resulting Net Operating Surplus (which is the key measure of Government's Financial Performance);
- A Forecast Position Statement, which reports the assets and liabilities Government expects to have at the end of each fiscal year for the forecast period, and the resulting Net Worth (which is the key measure of the Government's financial position);
- A Forecast Statement of Cash Flows, which reports the Operating, Investing (asset-related) and Financing (borrowing-related) cash flows for the forecast period and the resulting Net Increase/Decrease in cash and cash equivalents (which is the measure of the Government's cash position); and
- A Forecast Statement of Changes in Net Worth, which reports the forecast increase or decrease in Net Worth and its composition (which is the key measure of the amount citizens have invested in the Government).

In accordance with the requirements of the PMFL, the forecast financial statements provide two sets of figures: one for the Core Government; and one for the Entire Public Sector. Both sets include the financial activity (Performance Statement, Position Statement and cash flow statement) of Public Authorities (Statutory Authorities and Government Companies).

#### The Core Government comprises:

- H.E. The Governor's Office;
- The Legislative Assembly;
- Ministries and Portfolios:
- Judicial Administration; and
- Offices for the Auditor General, Cabinet, the Information Commissioner, the Complaints Commissioner, the Premier and the Director of Public Prosecution.

It also includes the Operating Surpluses/Deficits of Public Authorities as a single line in the Performance Statement entitled 'Net (Profit)/Loss in Public Authorities'. Similarly, the net worth of Public Authorities is recognised in a single line in the Position Statement entitled 'Net Worth of Public Authorities'.

The Entire Public Sector includes the same information as for the Core Government plus the revenues, expenses, assets and liabilities of Public Authorities on a line-by-line basis by aggregating them with the revenues, expenses, assets and liabilities of the Core Government. The key measures of Government's financial performance (i.e. Net Operating Surplus, Net Worth) are the same for both the Core Government and the Entire Public Sector.

# Update on Current Year's Financial Performance

For the fiscal year ending 30<sup>th</sup> June 2013, Government's **Operating Surplus** is forecast to be \$51.1 million. This amount is \$31.2 million less than the \$82.3 million originally budgeted.

The lower than expected operating performance is due primarily to shortfalls in operating **revenues**. The key items contributing to this shortfall are as follows:

- Other Import Duty: \$11.3 million less than budget due to continued delays in the construction in the Special Economic Zone;
- Departure Tax: \$2.2 million less than budget due to legislative delays and other timing issues;
- Special Economic Zone Grant Fee: \$2.6 million less than budget due to project delays;
- Health Insurance Fund Fees: \$2.2 million less than budget due to legislative delays;
- Motor Vehicle Charges: \$2.6 million less than budget partially due to timing and delayed implementation of revised fees;
- Work Permit Fees: \$5.1 million less than budget partially due to delayed implementation as well as the accounting policy of partial recognition in the current year for new and renewed work permits.

Changes in Government policy also resulted in the following initially budgeted revenue measures being deferred in 2012/13 to commence in 2013/14:

- Fund Directors Fees with a budgeted revenue of \$10.0 million;
- Compliance Fee (all other Directors) with a budgeted revenue of \$18.2 million;
- Fees for Directors of Licenced Security Investment Businesses with a budgeted revenue of \$1.4 million;

- Fees for Directors of Regulated Entities with a budgeted revenue of \$1.6 million; and
- Master Fund Registration Fees with budgeted revenue of \$1.8 million.

The following revenue items are forecast to perform better than originally budgeted in 2012/13:

- Annual Permanent Residency Fees are expected to be \$2.4 million higher than budget, this
  is primarily due to greater collection and enforcement efforts by the Department of
  Immigration;
- Revenue from Money Transfer Fees are forecast to be approximately \$1.2 million higher than the 2012/13 budget;
- Revenue from **Motor Vehicle Driver's License Fees** are forecast to be \$1.0 million higher than the 2012/13 budget as a result of increased fees;
- Mutual Fund Administrators License Fees are forecast to be \$1.1 million higher than the budget anticipated;
- Security Investment Business Licence Fees are forecast to be \$3.0 million higher than the 2012/13 original budget due to increased activities;
- Term Limit Exemption Grant Fee and Term Limit Exemption Renewal Fees are forecast to be \$2.5 million higher than initial budget estimates;
  - Revenue from Land-Holding Companies Share Transfers is expected to be \$3.8 million higher than initial budget estimates due to two unusually large transactions which occurred during the fiscal year; and
  - Stamp Duty on Land Transfers is expected to be \$8.1 million higher than the initial budget due to duties associated with the increase in sale of properties.

Total Operating Expense is forecast to be \$566.6 million for the fiscal year ending 30<sup>th</sup> June 2013. This is comparable to that shown in the 2012/13 original budget. The following are material variances which have occurred during the year:

- Personnel Cost is forecast to be \$243.5 million, this amount is \$7.4 million lower than the
  original budget and is mainly due to attrition and recruitment restrictions;
- Supplies and Consumables Costs are forecast to be \$5.1 million lower than the original budget. This is due to savings in professional fees, marketing, maintenance and other areas;

- Outputs from Statutory Authorities and Government Owned Companies is forecast to be \$4.2 million higher than the original budget due to increased utilization at the Health Services Authority;
- Outputs from Non-Government Output suppliers is forecast to be \$8.1 million higher than the original budget due to an increase in the cost of providing medical care at overseas institutions for indigents; and
- Transfer Payments is forecast to be \$1.3 million higher due to increased scholarships awarded.

In addition, Gains on Financial Instruments is forecast to be better than budget by \$1.9 million thereby improving the Government's operating position.

As a sector, Statutory Authorities and Government Owned Companies, collectively called **Public Authorities**, are forecast to make a Net Surplus of \$1.3 million in 2012/13. This amount is \$0.6 million less than the budgeted performance of a \$1.9 million surplus. The deteriorated forecast performance is due to negative performance variance by the Water Authority of \$0.7 million and the Cayman Islands National Insurance Company (CINICO) of \$0.5 million. This has been partially offset by better than expected performance by the Civil Aviation Authority of \$0.5 million.

Core Government is forecast to have closing **bank account balances** totalling \$99.7 million for the fiscal year ending 30<sup>th</sup> June 2013. This amount is \$20.0 million less than the \$119.7 million shown in the 2012/13 original budget and is directly related to the lower than expected revenue performance. For the Entire Public Sector (EPS), closing bank balance for fiscal year 2012/13 is forecast to be \$157.8 million; this amount is \$25.1 million less than the \$182.9 million shown in the 2012/13 budget.

Core Government **debt** is forecast to be \$575.4 million at the end of fiscal year 2012/13. For the Entire Public Sector, the closing debt balance for 2012/13 is forecast to be \$717.9 million. These balances closely accord with the balances shown in the 2012/13 original budget.

Core Government initially budgeted to spend \$53.3 million on **investing activities** (the purchase of property plant and equipment, equity injections and granting of loans less investment receipts) for fiscal year 2012/13; the 2012/13 forecast shows \$52.8 million which is approximately \$0.5 million less. For the Entire Public Sector, the investing budget was \$68.0 million for 2012/13, that amount is now forecast to be \$61.2 million.

During the 2012/13 fiscal year, Cabinet approved changes to various appropriations under Section 11(5) of the Public Management and Finance Law (2012 Revision) (see page 55).

These approvals amended the budgetary appropriations shown in the original 2012/13 Annual Plan and Estimates. The approvals transferred underspends in certain budgetary allocations (such as the

Juvenile Remand Facility) to compensate for over expenditures in other areas (such as Scholarships and the provision of tertiary level care at various overseas medical institutions).

# Forecast Financial Performance for FY 2013/14 and 2014/15

For fiscal years 2013/14 and 2014/15 Government's **operating surplus** is forecast to be \$118.1 million and \$135.8 million respectively. These forecast results are less than those targeted in the three year fiscal plan agreed with the FCO. In 2013/14 the forecast Surplus is \$6.2 million less than target, and for 2014/15 it is \$2.5 million less than target. Specific details of the assumptions used in the preparation of this forecast are shown on pages 30-34.

The performance of **Public Authorities** are forecast to improve their operating performance to \$1.9 million and \$2.9 million in 2013/14 and 2014/15 respectively.

Core Government closing **cash balances** are forecast to be \$166.3 million at the end of fiscal year 2013/14 and \$250.4 million at the end of fiscal year 2014/15. These forecast cash balances are less than those targeted in the three year fiscal plan agreed with the FCO. In 2013/14 the forecast cash balance is \$25.6 million less than target, and for 2014/15 it is \$28 million less than target.

For fiscal year's 2013/14 and 2014/15, the EPS closing cash balances are forecast to be \$221.2 million and \$303.7 million respectively.

Core Government **debt** is forecast to be \$549.0 million at the end of fiscal year 2013/14 and \$523.7 million at the end of fiscal year 2014/15.

For the EPS, the forecast debt is \$677.6 million at the end of 2013/14 and \$638.8 million at the end of 2014/15.

**Equity Investments** made by Government into Public Authorities are expected to remain at similar levels over the forecast period as those shown in the 2012/13 Annual Plan and Estimates.

The Government's **annual capital program** is informed by the specific policies of the Government of the day. Therefore, while this document forecasts a provisional sum of \$27.5 million and \$28.0 million in 2013/14 and 2014/15 for the purchase of property plant and equipment (see page 37 for Forecast Statement of Cash Flows), specific details on assets to be acquired will be decided by the incoming Cabinet.

The Table below summarizes the fiscal outlook for the Core Government and the Entire Public Sector during the forecast period.

# 6. RISKS AND SCENARIOS

Cash Balance at end of period

### Introduction

Financial and economic forecasting carries certain inherent risks. The constant policy assumption which underpins the PREFU's forecasts do not take into account natural disasters (such as hurricanes), international legislation which may have an adverse impact on the Financial Services Industry, Policy measures which may be imposed by the UK Government or other material shocks to the local economy.

The Cayman Islands will hold its next General Elections on May 22nd, 2013. The fiscal and economic performance of the Cayman Islands is largely influenced by the policies of the Government of the day. Changes to Cabinet following the General Election outcome therefore poses some risk to the forecast positions outlined.

In August 2012, the Government agreed a three-year fiscal plan with the FCO. The forecast financial trajectory in this PREFU does not accord with that plan; as such, further austerity measures must be mandated to regain compliance or there may be pressure to implement additional revenue measures in future years.

#### **Economic Risks**

The PREFU is premised on a constant-policy assumption and does not contemplate any shocks to the economy. The Cayman Islands' two main economic pillars (Financial Services and Tourism) are dependent on the global economy. Material changes to the global economic landscape could have the potential to materially change the forecast position. For example, a further worsening of the European debt crisis could lead to adverse conditions worldwide in the financial markets which would limit the forecast growth.

The economic forecast also assumes the continuation/ commencement of major private sector construction projects, in the Cayman Islands, during the forecast period. If these projects do not come to fruition, it will negatively impact the forecast unemployment rate, GDP growth and other economic indicators.

#### General Fiscal Risks

**Revenue**: The revenue forecast is predicated on constant economic growth of 2.4%. That growth is based on the commencement or continuation of certain private sector projects, a booming financial services market and continued increase in tourist arrivals. Changes in those economic factors could negatively impact the forecast revenue.

Any delays to the planned implementation of revenue measures in 2013/14 and 2014/15 will have a material negative impact on the forecast Operating Surplus and Cash position. The specific assumptions used for the Revenue forecasts are shown on page 31.

**Expenditure**: The expense forecast takes into account representations made to the FCO as part of the Government's 3-year fiscal plan. Some aspects of the plan do not yet have clear policy decisions which are required to implement (such as the merging of certain Public Sector Agencies to save \$4.9 million per annum), as a result there is a risk that forecast expenditure could be higher or lower than planned.

**Borrowing**: The forecasts assume no new borrowings as per the fiscal plan agreed with the FCO, this restriction creates a potential liquidity risk for the Government throughout the forecast period. If

there is any significant delay in the rate of planned cash inflows from revenue or increases in operating expenses, the government would not be able to fund its operations through borrowing.

#### Other Risks

Interest rate risk: The Government utilizes the local banking system for short term deposits at the prevailing interest rate. During the forecast period, the Government is also expected to enter into overdraft facilities based on market interest rates. Changes to those rates present a risk for the Government.

The Port Authority, Cayman Airways and the Health Services Authority have loans with floating/variable interest rates. As a result, these Agencies are subject to risk due to fluctuations in interest for those financial instruments.

**Litigation risk:** The Government is sometimes engaged in litigation arising in the ordinary course of its business. While it is not believed that any such litigation will individually, or in aggregate, have a material adverse financial effect on the Government, there is a risk that the Courts could rule unfavorably with regards to the Government.

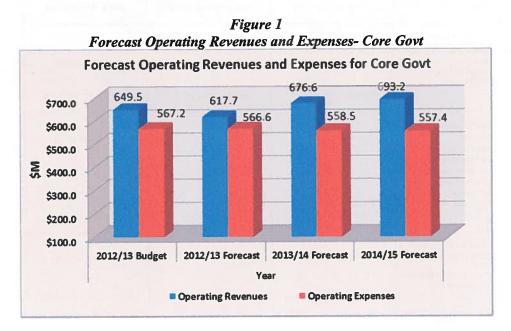

**Credit risk:** The Government is forecast to have trade receivables of approximately \$34.3 million at the end of fiscal year 2012/13. The Government is exposed to credit-related losses in the event of non-performance by counter parties to these financial instruments.

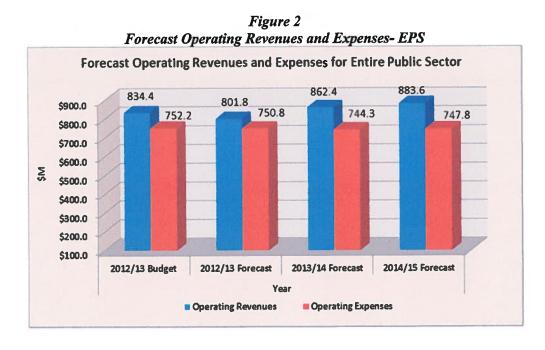

The Government extended several loans for overseas medical care and more recently under a "save the mortgage fund". The Government is exposed to credit-related losses in respect of these instruments due to tenure, nature and purpose associated with these types of loans.

# 7. OVERVIEW OF FINANCIAL FORECASTS

These forecasts have been prepared using a "constant policy" assumption which means that all government policy reflected in the latest 2012/13 Budget, and all Cabinet decisions made up to 23<sup>rd</sup> April 2013 are reflected in these forecasts.

Figures 1 and 2 summarise the 2012/13, 2013/14, and 2014/15 financial forecasts for the Core Government and the Entire Public Sector respectively.

# Compliance with Principles of Responsible Financial Management

The ratios above were all calculated in accordance with the new Framework for Fiscal Responsibility (FFR).

The following definitions accord with the FFR:

Operating Revenue consists of coercive and non-coercive revenue as defined in the PMFL.

**Expenditure**, unless otherwise specified, refers to all public expenditure (inclusive of grants, capital and recurrent expenditure).

#### **Public Borrowing includes:**

- conventional borrowing from commercial and concessional institutions;
- the capitalized value of all alternative financing transactions (including PFI/PPP arrangements) that will place future financial obligations (in terms of increased expenditure or reduced revenue) on the Cayman Islands Government;
- the risk weighted debts and PPP/PFI arrangements of Statutory Authorities, Government Corporations and Companies;
- borrowing that is contracted by the Cayman Islands Government, but then on-lent; and
- any other debt guaranteed by the Cayman Islands Government.

Public borrowing taken out to clear "informal debt" or debt owed by one public sector entity or another (including arrears of such debts) will be treated as new debt.

**Debt Service** is defined as annual payments resulting from public borrowing commitments and finance leases or any other form of borrowing. This includes all borrowings of the entire Public Sector and not just those of the Core Government. It also includes any other debt guaranteed by the Cayman Islands Government.

**Net Debt** is defined as the total outstanding value of public borrowing minus liquid assets.

**Liquid Assets** are defined as the lowest balance of liquid funds at the disposal of the Cayman Islands Government during the fiscal year. These funds should not be pledged against budgeted expenses or liabilities of any form.

#### Statement on Compliance with the Principles of Responsible Financial Management

The forecast financial statements included in this PREFU shows that the Government will maintain full compliance with the Principles of Responsible Financial Management relating to **Operating Surplus**, **Net Worth** and the management of **Financial Risks**.

The Government is also expected to become compliant with the **Net Debt Ratio** at the end of 2013/14 when Net Debt is forecast to be 68.2% which is below the maximum of 80%.

The **Cash Reserve days** (which is required to be greater than 90 days) is forecasted to be in compliance in 2014/15.

Compliance with the **Debt Servicing ratio** (which is required to be below 10%) is not forecast to be achieved over the period covered by the PREFU.

The 3-year fiscal plan agreed with the Foreign and Commonwealth Office requires that the Cayman Islands Government comply with all the requirements under the Principles of Responsible Financial Management by June of 2016, which is one more year than is covered by this PREFU.

# 8. CONCLUSION

As required by the Public Management and Finance Law (2012 revision), this Pre-Election Economic and Financial Update presents the financial and macroeconomic forecasts and assumptions for the current fiscal year and the succeeding two fiscal years, and related commentary on the current trajectory of Government finances.

The economic forecast shows positive indicators for growth and reduced unemployment over the forecast period. It also shows a declining ratio of Net Debt-to-GDP which is a positive indicator of the Government's credit worthiness.

The forecasts are contingent on stable international economic conditions, private sector growth and the absence of economic shocks resulting from natural disasters or adverse international legislation.

For the fiscal year ending 30<sup>th</sup> June 2013, the Government is forecast to have an Operating Surplus of \$51.1 million. This forecast result is \$31.2 million less than the \$82.3 million originally budgeted, and results from lower than expected revenues.

Core Government is forecast to have a closing cash balance of \$99.7 million for the fiscal year ending 30<sup>th</sup> June 2013. That forecast amount is \$20.0 million less than the \$119.7 million shown in the original budget. The lower than expected closing cash balance may require the Government to seek approval (from the FCO) for a bank overdraft to maintain operations during the first six months of fiscal year 2013/14.

For the Entire Public Sector (EPS), closing bank balance for fiscal year 2012/13 is forecast to be \$157.8 million; this amount is \$25.1 million less than the \$182.9 million shown in the 2012/13 budget.

Core Government debt is forecast to be \$575.4 million at the end of fiscal year 2013/14. This accord with the original budget as all debt service obligations are expected to be met. For the wider Public Sector, the closing debt balance for is forecast to be \$717.9 million at the end of 2012/13.

The Government is forecast to be in full compliance with the Principles of Responsible Financial Management relating to Net Operating Surplus and Net Worth throughout the forecast period. Compliance with the Principles which requires a Net Debt Ratio of less than 80% is forecast to be achieved in 2013/14 and 2014/15. Cash Reserve requirement (should be more than 90 days of executive expenses) will achieve compliance in 2014/15. However, compliance will not be achieved for the Debt Servicing Ratio (should be less than 10%) during the forecast period.

The Public Finance section in the Ministry of Finance, District Administration, Works, Lands & Agriculture have used its best professional judgment in preparing this Pre-Election Economic and Financial Update. The information contained herein is based on the known performance, policies and financial position as at 23<sup>rd</sup> April 2013.

## 9. GOVERNMENT FORECAST FINANCIAL STATEMENTS

GOVERNMENT OF THE CAYMAN ISLANDS
FORECAST FINANCIAL STATEMENTS
FOR THE YEARS ENDING 30 JUNE 2013, 2014 and 2015

Statement of Accounting Policies

**General Accounting Policies** 

#### Reporting entity

These forecast financial statements are for the Government of the Cayman Islands. They encompass the Core Government and the Entire Public Sector as required by the Public Management and Finance Law (2012 Revision). The reporting entity comprises:

- H.E. The Governor's Office;
- Ministries and Portfolios;
- Statutory Authorities;
- Government Companies; and
- The Audit Office, the Office of the Complaints Commissioner, the Office of the Information Commissioner, Cabinet, the Premier and the Director of Public Prosecution.

In the accounts of the Core Government, Statutory Authorities and Government Owned companies are accounted for on an equity accounting basis. The accounts for the Entire Public Sector show all Agencies on a fully consolidated basis.

# **Basis of preparation**

The forecast financial statements have been prepared in accordance with International Public Sector Accounting Standards (IPSAS) using the accrual basis of accounting. Where there is currently no IPSAS, other authoritative pronouncements such as International Accounting Standards (IAS), or the United Kingdom reporting standards applicable to the public sector have been used. The measurement base applied is historical cost adjusted for revaluations of certain assets.

The forecast financial statements have been prepared on a going concern basis and the accounting policies have been applied consistently throughout the period.

# **Reporting Period**

The reporting period are the years ending 30 June 2013, 2014 and 2015.

#### **Basis of Consolidation**

The consolidated Entire Public Sector financial report includes the transactions and balances of the Government of the Cayman Islands and its controlled entities during and at the end of the financial year. The controlled entities are combined using the purchase method of combination. Corresponding assets, liabilities, revenues and expenses are added together, line by line. Transactions and balances between these sub-entities are eliminated on combination.

# GOVERNMENT OF THE CAYMAN ISLANDS FORECAST FINANCIAL STATEMENTS FOR THE YEARS ENDING 30 JUNE 2013, 2014, 2015

Statement of Significant Assumptions

#### **General Forecast Assumptions**

These forecast financial statements were finalised on 23<sup>rd</sup> April 2013. They have been prepared under a "constant policy assumption" and take into consideration all of the assented legislation and Cabinet decisions made up to 23<sup>rd</sup> April 2013.

The forecast uses the most recent estimate for the outturn of fiscal year 2012/13 as its base. Future years are then adjusted to take into account the probable implementation of measures and undertakings agreed with the Foreign and Commonwealth Office (FCO).

The forecast excludes measures which are unlikely to come to fruition during the forecast period due to the absence of policies or execution.

Unless stated otherwise in the specific forecast assumptions, revenues are expected to generally increase at a rate of 2.4% per year over the forecast period. This is consistent with the expected average GDP growth.

Unless stated otherwise in the specific assumptions section, expenditure increases are forecast to be in line with general inflation. Those increases exclude certain known costs (such as those paid for subscriptions, interest, court settlements etc.) or areas where specific strategies are forecast to curb the rate of expenditure.

This estimate combines the realities of inflation and changes in volume, with expected savings from further efficiency measures.

#### **Macroeconomic Assumptions**

- Demographic trends remain constant;
- Rates underlying coercive revenue and the application of those rates are unchanged unless otherwise stated:
- Rates underlying user fees and charges and the application of those rates are unchanged;
- Debt servicing assumptions are based on assumed interest rates and current borrowing agreements;
- The exchange rate between the Cayman Dollar and the U.S. Dollar remains fixed; and
- No material contingent liabilities or other claims become actual liabilities.

#### **Specific Forecast Assumptions**

The following are specific **revenue assumptions** for the numbers shown in the forecast financial statements:

- Forecast revenue from "Departure Tax" was increased to an estimated annual collection
  of \$5.0 million starting in 2013/14. This follows the implementation of relevant legislation
  in 2012/13 and the expected finalization of various protocol measures by the Cayman
  Islands Airports Authority;
- Forecast revenue from "Health Insurance Fund Fees" was increased by \$1.4 million in 2013/14, this reflects the full year impact of an increase to the fee which was implemented in 2012/13;
- Forecast revenue from "Local Vessel Licences" was increased by \$179,000 in 2013/14 to reflect the full year impact of legislation which was implemented late in 2012/13;
- Forecast revenue from "Motor Vehicle Charges" was increased by \$3.0 million in 2013/14 to reflect the full year effect of increased fees Gazetted in September 2012;
- Forecast revenue from Misc. Stamp Duty was increased by \$1.0 million in 2013/14 to
   reflect the full year effect of a 2% fee on the value of property insurance premiums. This was Gazetted in December 2012;
- Forecast revenue from "Tourist Accommodation Charges" was increased by \$1.5 million in 2013/14 to reflect a 30% increase in the rate. This was Gazetted in December 2012;
- Forecast revenue from "Work Permit Fees" was increased by \$3.8 million in 2013/14 to reflect various increases to fees which were Gazetted in September 2012;
- Introduction of "Fund Directors Fees" is forecasted to produce revenues of \$10.0 million in 2013/14 and \$10.3 million in 2014/15;
- Introduction of "Compliance Fee" (all other Directors) is forecasted to produce revenues of \$18.2 million in 2013/14 and \$18.7 million in 2014/15;
- Introduction of "Fees for Directors of Licenced Security Investment Businesses" is forecasted to produce revenues of \$1.4 million in 2013/14 and \$1.5 in 2014/15;
- Introduction of "Fees for Directors of Regulated Entities" is forecasted to produce revenues of \$1.6 million in 2013/14 and \$1.7 million in 2014/15;
- Introduction of "Master Fund Registration Fees" with budgeted revenue of \$1.8 million in 2013/14 and \$1.9 million in 2014/15;
- Forecast revenue from "Land Holding Companies Share Transfer Charges" was reduced by \$2.5 million in 2013/14 to reflect a one off transaction recorded in 2012/13; and
- Forecast revenue from "Stamp Duty Land Transfer" was reduced by \$9.6 million in 2013/14 to reflect the "one-off" nature of some of the transactions which occurred in

2012/13. The forecast revenue was then increased by \$3.0 million to reflect the full year impact of changes to the Stamp Duty Law which was gazetted in December 2012;

The following specific **expense assumptions** were used in producing the expenditure forecasts for the 2013/14 and 2014/15 fiscal years:

- Forecast expenses for salaries and wages were reduced by \$3.7 million in 2013/14. This accords with undertakings by the Deputy Governor to reduce personnel cost over the forecast period. A reduction of \$800,000 was also applied to reflect the full year impact of the cost of living adjustment (COLA) rollback which took place in September 2012. In accordance with the constitutional mandate, \$600,000 was added to cover the cost of 3 additional MLAs and a further \$2.9 million was reduced in 2014/15 to reflect the on-going reduction in Civil Servant numbers;
- Forecast expense for Civil Servant's health care costs was reduced by \$700,000 in fiscal year 2013/14. This is consistent with the forecast reduction in numbers of civil servants. This reduction was offset by an increase of \$1.8 million to reflect forecast increases in health care cost. Similarly, in 2014/15, \$589,000 was reduced on the basis of lower numbers, however, \$3.0 million was added for expected increases in the cost of health care;
- Forecast expense for pension payments are expected to fall by \$601,000 and \$478,000 in 2013/14 and 2014/15 respectively. This is in line with the forecast reduction in the number of civil servants. In 2014/15, new Civil Servants are expected to be hired under a new pension contribution arrangement thereby saving an additional \$800,000;
- Forecast expense for purchase of services is expected to be reduced by \$800,000 to reflect the cost of the referendum and General Elections held in 2012/13;
- In 2012/13, the Government carried out aerial photography of the Islands at a cost of \$250,000, this expense is not expected to reoccur in 2013/14. In fiscal year 2014/15 supplies and consumables are expected to decrease by \$600,000 to reflect the conclusion of certain major procurement works (such as the Cruise Port and Airport) which are expected to attract professional fees in 2013/14 for independent assessments;
- Forecast utility costs are expected to decrease by \$800,000 in 2013/14 to reflect the
  continued consolidation of the lease estate into the new energy efficient Government
  Administration building;
- Forecast expense for General Insurance is expected to decrease by \$3.0 million in 2013/14 and 2014/15, and to transfer \$3.0 million per year into a self-insurance fund;
- Forecast expense for travel and subsistence is expected to decrease by \$200,000 in 2014/15;

- Forecast expenses for operating leases are expected to decrease by \$750,000 in 2013/14
  as the Government continues to consolidate the lease estates into the Government
  Administration building;
- Financing expenses are expected to decrease over the forecast period as the Government's outstanding debt is reduced by repayments and no new borrowings are undertaken. As such, forecast expense for interest on bank overdraft and associated costs are expected to be zero by 2014/15 based on the Government's forecasted cash position;
- Forecast expense for Outputs purchased from the Cayman Islands National Insurance Company (CINICO) is expected to increase by \$1.4 million and \$2.3 million in 2013/14 and 2014/15 respectively. This is based on the projected increase in the cost of health care during those periods;
- Similarly, forecast expense for Outputs from the Health Services Authority is also expected to increase by \$1.5 million in 2013/14 and \$2.5 million in 2014/15;
- Forecast expense for "Rental Accommodations for Persons in Need" is expected to decrease by \$500,000 in fiscal year 2014/15 as more affordable homes become available;
- The level of expense for "services for refugees" is expected to decrease by approximately \$85,000 in 2013/14 to reflect a normalization of the annual costs. 2012/13 saw higher numbers than usual arrive in the Cayman Islands as refugees;
- Forecast expense for "Medical care at various overseas providers" is expected to increase marginally in 2013/14. It is believed that changes in Government policy will partially offset an increase to both the number of persons assisted and increases in global healthcare costs. In 2014/15 the forecast expense was reduced by \$1.7 million to reflect further maturing of changes to health policy and the presence of the Narayana University Medical Centre;
- The housing assistance program is expected to be a "one-off" item in 2012/13; therefore, the cost of \$890,000 is removed in 2013/14 and 2014/15;
- Forecast expense for the "Promotion of Nation Building and Church-based Support" is expected to be reduced by \$1.8 million in 2013/14 and \$1.0 million in 2014/15 in line with the 3-year plan agreed with the FCO;
- Forecast expense for the Caribbean Catastrophe Risk Insurance Facility (CCRIF) is expected to be reduced by \$770,000 as the Government withdraws from that program in 2013/14. The Government will add \$770,000 to the National Disaster Fund in 2013/14 and 2014/15.
- Forecast expense for "constituency allowance" was increased by \$91,000, from \$454,000 in 2012/13 to \$545,000 in 2013/14 to reflect the cost associated with 3 additional MLAs as set out in the new constitution.

The following specific assumptions are made with regards to **Borrowings** in the 2013/14 and 2014/15 fiscal years:

- Core Government will not incur any additional borrowings throughout the forecast period as a result the balance of outstanding debt is forecast to decline steadily from \$575.4 million in 2012/13 to \$549 million in 2013/14 down to \$523.7 million in 2014/15; and
- Statutory Authorities and Government Owned Companies are not expected to incur any
  additional borrowings over the forecast period. However, it is assumed that one Statutory
  Authority will refinance borrowing of \$31.8 million during 2014/15. This refinancing will
  involve an inflow and outflow of cash from borrowings at the Entire Public Sector level
  but will leave the outstanding debt balance unchanged.

The following specific assumptions are made with regards to **Capital Investments** in the 2013/14 and 2014/15 fiscal years:

- During the forecast period, the Government expects to provide similar levels of support to various Statutory Authorities and Government Owned Companies as those existing in the 2012/13 fiscal year. Therefore a provisional sum of \$23.0 million per year is forecasted; and
- The forecast provides for the purchase of property plant and equipment by the Core Government in the amount of \$27.5 million and \$28.0 million during 2013/14 and 2014/15 respectively. The exact projects that will be undertaken will be decided by the incoming Cabinet.

#### **Contingent Liabilities**

#### **Legal proceedings & disputes**

The Government is sometimes engaged in litigation arising in the ordinary course of its business. Estimates are developed by the Office of the Attorney General using current facts and known circumstances.

The factors considered in developing legal provisions include merits and jurisdiction of the litigation, the nature and number of other similar current and past litigation cases, the nature of the subject matter of the litigation, the likelihood of settlement and current state of settlement discussions, if any.

#### Post-Retirement Health Care

In addition to the Past Service Pension Liability, the Government also recognizes its obligations for the future health care costs of Civil Servants who earned that benefit based on their prior service with the Government.

Previously Civil Servants who worked for a minimum of 10 years with the Government would be entitled to a health care benefit upon retirement. However, the Public Service Management Law now requires that the employee puts in the same amount of years of qualifying service and also retire from the Civil Service in order to obtain such benefits in the future.

The exact amount of the health care liability has never been actuarially assessed and therefore not formally recognized on the Statement of Financial Position. However, the Government has engaged the services of an Actuary to carry out this assessment and the results are expected in 2013.

In the Government's medium term fiscal plan, a provisional sum of \$27.1 million has been included to address future increases in health care costs as well as its obligations to past employees. This amount is in addition to current annual health care provision.
